EC2 > Security Groups > sg-08f73f501e66abdcc - launch-wizard-1 > Edit inbound rules

Edit inbound rules Info

Inbound rules control the incoming traffic that's allowed to reach the instance.

Inbound rules Info

Security group rule ID	Type Info	Protocol Info	Port range Info	Source Info	Description - optional Info	
sgr-0f9dc5b144f827e86	HTTP	TCP	80	Custom	<div><div>0.0.0.0/0</div><div>X</div></div>	Delete
sgr-0f74cad76585ddb75	SSH	TCP	22	Custom	<div><div>0.0.0.0/0</div><div>X</div></div>	Delete
sgr-0e25850818cc60035	All ICMP - IPv4	ICMP	All	Custom	<div><div>0.0.0.0/0</div><div>X</div></div>	Delete

Add rule

Rules with source of 0.0.0.0/0 or ::/0 allow all IP addresses to access your instance. We recommend setting security group rules to allow access from known IP addresses only.

i-044e69ffec0bfe28d (public-3)

PublicIPs: 3.25.244.41 PrivateIPs: 12.0.1.239

1.Designed and Implemented Multi-VPC Architecture:

- Successfully created three Virtual Private Clouds (VPCs) with public and private subnets.
- Configured route tables, internet gateways, and NAT gateways to ensure secure communication and internet access.
- Demonstrated expertise in network segmentation and isolation.

2.Deployed EC2 Instances Across Subnets:

- Provisioned EC2 instances in both public and private subnets.
- Hosted a dummy website on private instances.
- Validated connectivity by pinging and curling between instances.

3.Transit Gateway for Inter-VPC Communication:

- Set up a transit gateway to enable seamless communication between private subnets across VPCs.
- Achieved efficient and scalable inter-VPC connectivity.
- Demonstrated proficiency in AWS networking services.
